Conflict Mineral Company Policy

We support industry-wide efforts to identify, reduce and hopefully eliminate the use of conflict minerals that originate from the Democratic Republic of Congo and adjoining countries that are considered to be financing or benefiting groups that are involved in human rights violations.

We are committed to not sourcing products, components and materials that we know contain conflict minerals and we have established a supplier survey to improve the transparency and traceability of metals in our supply chain.

Our suppliers are expected to establish their own conflict minerals policies, due diligence frameworks and management systems. These should be designed to prevent the aforementioned conflict minerals that originate from the DRC and adjoining countries from being included in the products that they sell to our company.

Best Regards
Massimo Tarchini
